

# RCDC, CACFP Product Formulation Statement Booklet

Dear Provider,

Enclosed you will find a packet of information that should help you in meeting the USDA's requirement of providing a Child Nutrition label (CN label) or a product formulation statement when you serve a processed food.

**What is a CN label** or product formulation statement? A CN label is a product label that contains a statement that clearly identifies the contribution that a product makes toward the child nutrition meal pattern requirements.

**A product formulation statement** comes directly from the manufacturer that gives specific information about a product including the total creditable amount of the product. This form is on company letterhead and is signed by a company representative.

What's the purpose of CN labels or product formulation statements? Certain products such as chicken nuggets or patties, fish sticks, corn dogs, etc. there is a mix of ingredients. It's not always easy to tell how much meat or bread a product provides.

A CN label or product formulation statement spells out the quantity of the product that's allowable. We have tried to help you by putting this booklet together. You will find product formulation statements for some of the most commonly used items.

- **You will need to purchase the exact brand and type of food listed on the product formulation statement.** For example: Banquet Original Chicken Nuggets, check the UPC code # for accuracy (we have included pictures for you too).
- If you are serving a processed food when a review is conducted, you will need to have this information, in addition to the package, available for your monitor.

If you decide to serve a processed food that is not included in our RCDC, CACFP Product Formulation Statement Booklet, you will be responsible for getting the CN label or product formulation statement yourself.

- You can do this by going to the company's website and under contact us, send the company an email stating the following: I am a Day Care provider located in Kansas. Kansas is requiring day care home providers that participate in the CACFP to have a CN Label or a Product Formulation Statement on file for all processed foods we are serving in our day cares. I am in need of the following Product Formulation Sheets so I can continue serving your companies processed foods.

(List UPC # of the products you want) Example:
UPC:
75094 00237 chicken nuggets
0075094 02310 corn dogs

- Remember, this only applies to processed foods you serve. **If you want to avoid this whole issue, it's easy, just serve other foods.** We will continue to research different products and will give you updated information at your reviews. If you find information, please share it with us as well.

As always, we strive to be a team with you and will do our best to help you!
